

**BMPRS COVID RISK ASSESSMENT FOR THE SPECIFIC HAZARD OF COVID SPREAD**

<b>Who might be harmed</b>	<b>How may they be harmed?</b>	<b>Controls required</b>	<b>Who needs to carry out the action and by when?</b>	<b>Follow up required? Additional info?</b>
<b>Racers, pit crew, club attendees and their families and associates</b>	Lack of Distance between people can result in increased covid spread.  This may result in illness, hospitalisation and death.	Social Distancing  Members not in social bubbles or same households should keep 2m apart as much as possible. Even when engaging in social interaction. Exception is during times of pitting when racing and on rescue boat when a 1mt min distance should be maintained if possible.	All attendees. On the race day, and ideally, prior too when visiting Service Stations for comfort breaks whilst travelling en-route to venue.	
<b>Spectators</b>		SEGREGATION Race / pit / car park area will be roped off to keep spectators away from attendees.	Allocated members prior to races.	
<b>Vulnerable persons, elderly, sick or those with underlying health issues</b>		Close interaction with interested outside parties will not be permitted.	OOD and club members to assume responsibility at all times.	
<b>All Attendees and people who come into the enclosed "competition arena".</b>		PPE  Face Masks should be worn by people unless exempt.	Attendees who are unable to social distance when pitting or in rescue should ideally wear a protective approved face mask.	
<b>All Attendees and people who come into the enclosed "competition arena".</b>	Covid is spread through physical contact. Physical contact can be a major pathway for spreading this disease.	Hand washing is a must for every one attending the meeting. This will reduce the pathway of physical contact spreading this virus.	Sanitisers should be used by members and it is recommended they are used regularly during the day. BMPRS and its members will provide access to sanitisers as required.	

<b>BMPRS COVID RISK ASSESSMENT FOR THE <u>SPECIFIC HAZARD OF COVID SPREAD</u></b>				
<b>All Attendees and people who come into the enclosed "competition arena".</b>	People who exhibit Covid symptoms	If anyone has symptoms of covid, or thinks they might possibly have Covid symptoms then this means they could have the virus and share it with people at the event	Do not come to the event under any circumstances if you think you are at risk of having Covid.	
<b>All Attendees and people who come into the enclosed "competition arena".</b>	People who may have been in recent close contact with covid positive persons.	BMPRS recommend the use of freely provided and widely available lateral flow tests	If members think they may have been in contact with covid BMPRS recommend they test before attending.	
<b>All Attendees and people who come into the enclosed "competition arena".</b>	Unvaccinated people are at high risk of contracting covid and becoming seriously sick as a result.	BMPRS recommend all attendees have been jabbed with latest VACCINES and seriously consider delaying attending meetings until they are fully protected.	It would be advisable to let us know upon entry if you have not kept upto date with VACCINES so we can further reduce and minimise your exposure to any risks on race day.	

The above BMPRS Covid Risk assessment is subject to updates to Government guidelines and restrictions which may change at short notice. Hopefully the restrictions due to covid will lessen over the next few months. But in the mean time, better to be safe and cautious than unsafe and sorry!
